

# Knowledge-Based Innovative Solutions to Enhance Adding-Value Mechanisms towards Healthy and Sustainable EU Fisheries

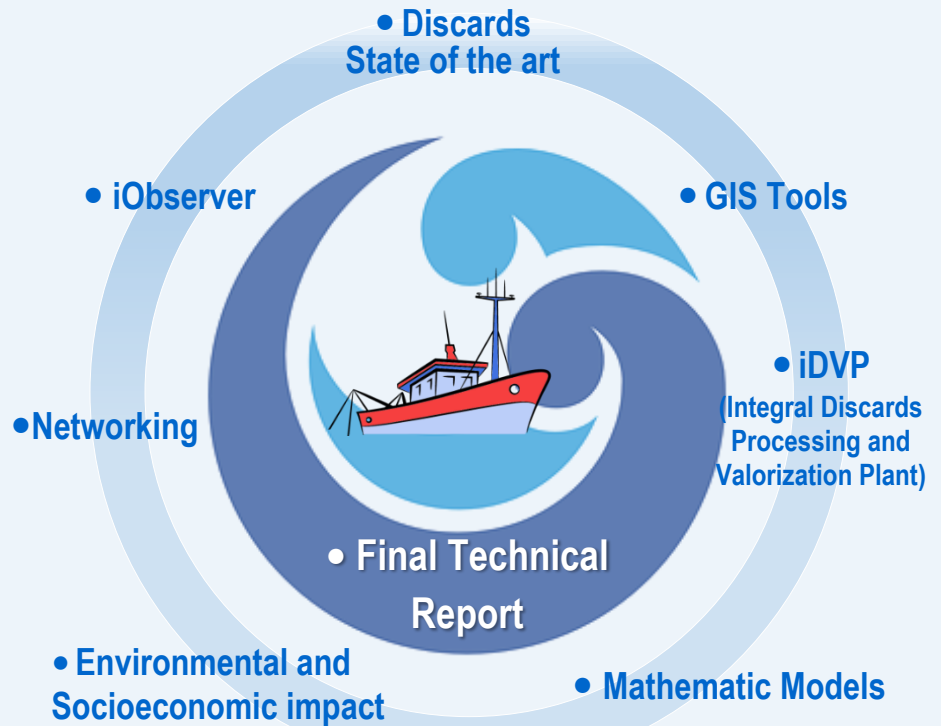

## - LIFE iSEAS -

The main objective of LIFE iSEAS was to demonstrate that a sustainable scenario (in terms of biological and socio-economic indicators) of the EU fisheries was possible through the enhancement of the real application on the fishing sector of existent knowledge and innovative solutions for discards reduction and management.

LIFE iSEAS runs from 1 July 2014 to 30 June 2018. Here you can find and download a list of the project publicly available outputs. To learn more about the project please visit: <http://lifeiseas.eu/>
